Kelas = TI C

❖ Algoritma

1. User input email dan password
2. jika email dan password yang diinputkan benar maka user boleh masuk ke user menu, dan apabila email dan password yang dimasukan salah sebanyak 3 kali maka user akan diblokir.

❖ Flowchart

❖ Pseudocode

```
<?php
include ('acak.php');
session_start();
$user = 'Firman';
$pass = kodeAcak(4);
$i=0;

$username = $_POST['username'];
$password = $_POST['password'];

if ($username==$user && $password==$pass) {
    $_SESSION['user']=$user;
    $_SESSION['block']=0;
    $i=1;
    echo "<script>alert('Sucess'); window.location =
('dashboard.php')</script>";
}
else {
    echo"
    <script type=\"text/javascript\">
    var val = '$pass';
    alert('password anda yang benar: '+val);
    location = 'index.php';
    </script>
    ";
    //echo "<script>alert('Wrong password or username');
window.location = ('index.php')</script>";
}
?>
```
